- **Project Description:**

The domain of the café management system is the industry of point-of-sale systems. University cafes, coffee shops and other local cafes come under this domain. Things related to tracking orders, managing items, managing sellers and employees, customer management and many other aspects come under the domain of the café management system.

- **Problem Statement:**

Currently there is a lack of easy to use and effective café management system to effectively perform tasks related to managing inventory, managing orders etc. Currently the manual processes of selling items at university cafes lead to poor customer experiences and errors in tracking sales etc. and customers also face difficulties in buying items from cafes.

- **Problem Solution:**

Our development of a comprehensive café management system will minimize these problems related to management of inventory items, buying of items and will provide a user-friendly environment to all the users of the platform to perform their related tasks easily and efficiently. Our café management system will allow the café owners to improve their café experience.

- **Advantages/Benefits of proposed system:**

- User-friendly system
- Enhanced customer experience

- Effective management of inventory items
 - Accuracy in sales
 - Insights into sales and orders
 - Simplified tasks for all users
-
- **Scope:**
 1. **Users:**
 1. Administrators
 2. Sellers
 3. Customers
 2. **Modules:**
 1. **Admin panel:**
 - Employee management
 - Items management
 2. **Seller panel:**
 - Order Management
 - Inventory Management
 - Feedback management
 - Sales analytics
 3. **Customer panel**
 - View Menu Items

- Order Placement
- reviews

3. Functional Requirements:

1. Administrator:

1. Add items to café
2. Remove items from café
3. Add sellers
4. Edit items from café

2. Seller:

1. View past orders
2. Update inventory
3. View reviews
4. Order Management
5. Inventory Details

3. Customer:

1. Reserve tables
2. View unreserved tables
3. Place orders
4. Give feedback
5. View menu items

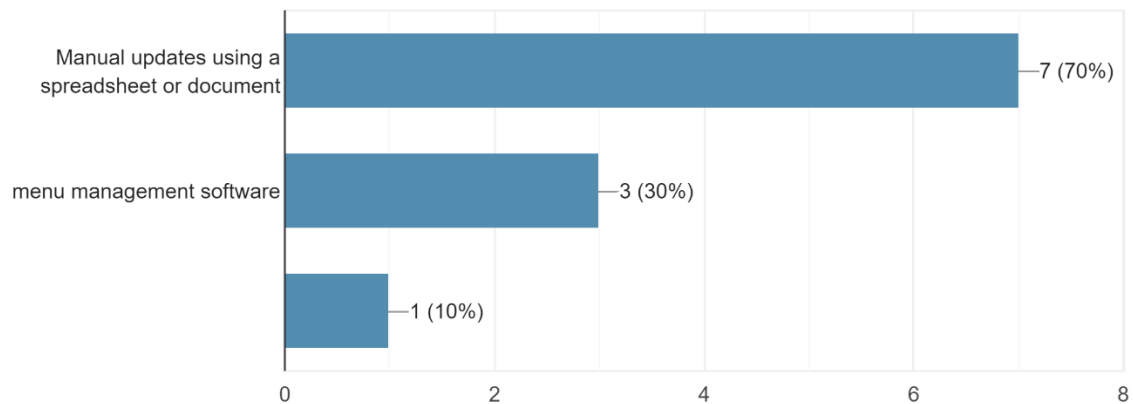

• Planning Approach:

We have performed an online survey through questionnaire to gather the requirements from the users of café management system. The questionnaire was the easiest approach and it helped us gain good insights into the requirements and problems faced by the café owners and customers.

Here are the few responses we got from the stakeholders of café management system.

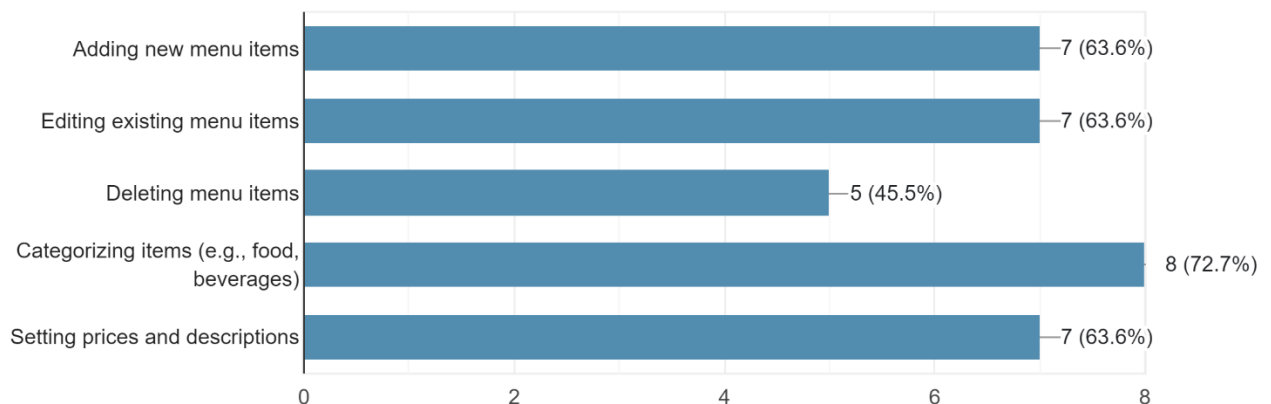

How do you currently handle menu updates and changes?

10 responses

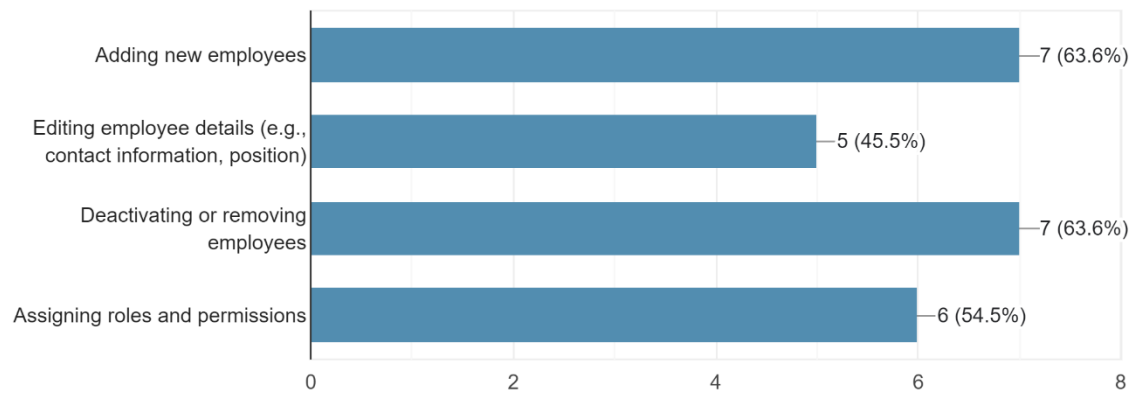

Which features are crucial for efficient items management?

11 responses

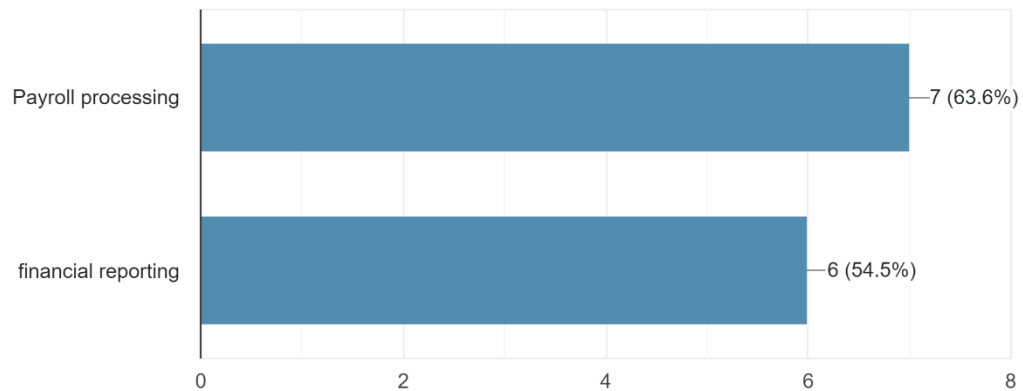

Which functionalities are essential for effective employee management?

11 responses

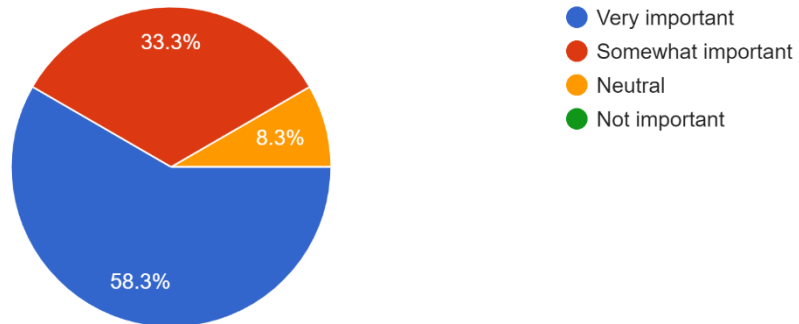

What administrative tasks do you find most time-consuming or challenging to manage in your café?

11 responses

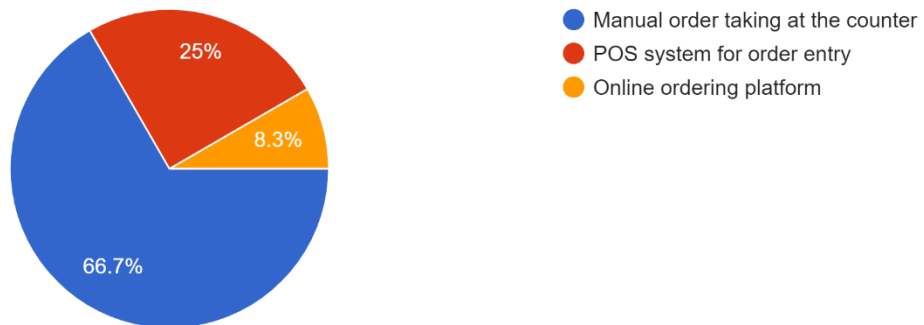

What is the importance of a user-friendly environment for effective order management.

12 responses

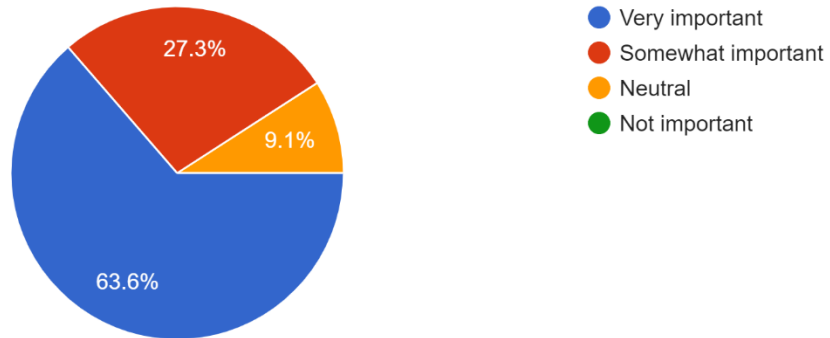

How do you currently handle order processing in your café?

12 responses

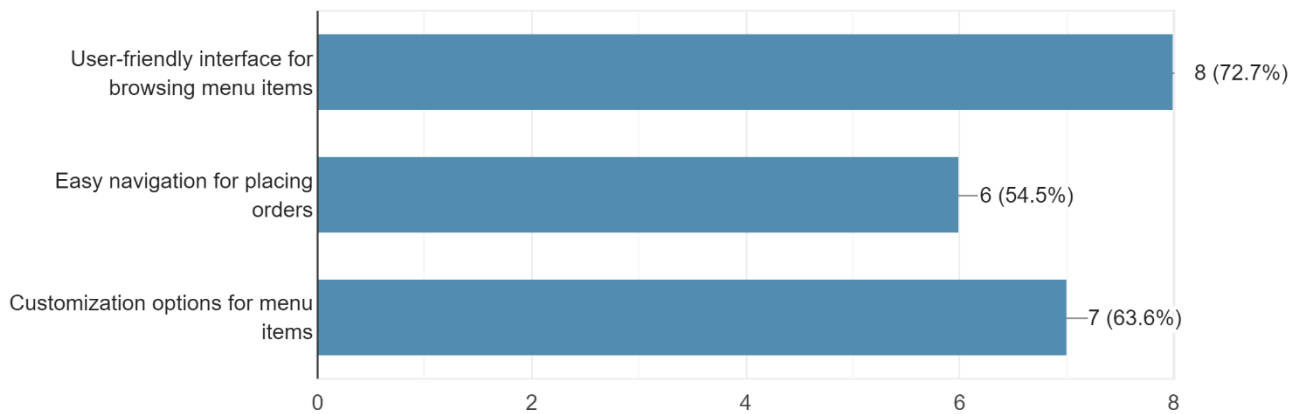

How important is customer feedback collection and analysis for improving your cafe's operations?

11 responses

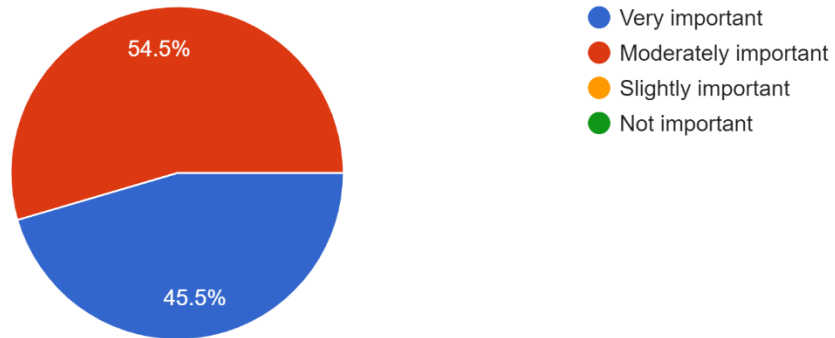

What features are essential for a seamless and enjoyable ordering experience in the customer panel?

11 responses

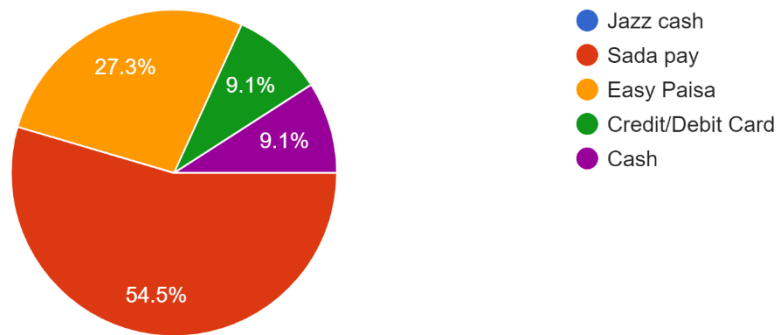

How important is it to have access to real-time updates on order status?

11 responses

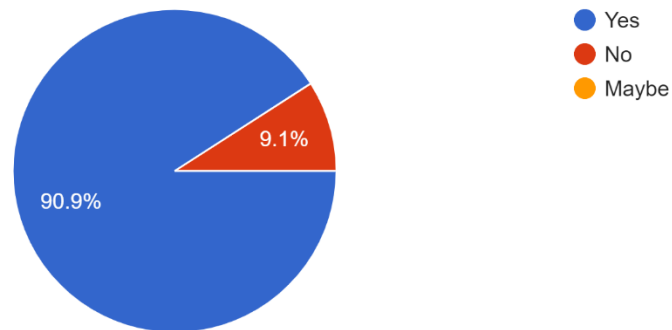

What payment options do you prefer when ordering from the customer panel?

11 responses

Would you prefer to have the option to make table reservations through the customer panel?
11 responses
